# Smart Home Appliances

## Smart Scientific Fitness

Health tracking Wi-Fi smart scales to help you stay in control and reach your goals. eco4life uses advanced Bioelectric Impedance Analysis (BIA) technology.

When you stand on the scale, a very low, safe electrical signal is sent from four metal electrodes through your feet to your legs and abdomen.

## Smart Home Appliance

- ☒ allows your many devices to easily communicate and sync with one another
- ☒ These new appliances can be traced to the explosion of mobile devices

### Smart Scale

The electrical signal passes quickly through water that is present in hydrated muscle tissue but meets resistance when it hits fat tissue. This resistance, known as impedance, is measured and input into scientifically validated eco4life equations to calculate body composition measurements.

### Wet/Dry Vacuum

Cordless Wet/Dry Vacuum Cleaner and Mop - Powerful One-Step Cleaning for Hard Floors, Great for Sticky Messes and Pet Hair.

### Hydroponics Growing System

eco4life Essential Oil Diffuser is designed to bring you relaxation with fragrance, you can use different kinds of pure essential oil with water to get the aromatherapy result you need.
